

Lighten, Brighten, and Lift Your Skin for Ageless Beauty

Aging is inevitable but looking your age doesn't have to be.

With Emmy Nutrition's Intense Brightening Cream you can:

- Lighten and brighten tone
- Lift skin and reduce the appearance of fine lines and wrinkles
- Promote natural UVA and UVB protection
- Fade age spots
- Reduce redness
- Immediately hydrate skin
- Support youthful collagen production

All in less than three weeks!

Naturally Inhibit Melanin Synthesis for a Lighter Tone

Our Intense Brightening cream is made using an all-natural skin lightener from the fermented acids found in vegetables. So, unlike those other harsh creams on the market, it won't irritate your delicate skin or worsen hyperpigmentation.

Yet, it's been shown in clinical trials to be just as effective as arbutin, a form of hydroquinone. In fact, participants who used the skin lightener in Emmy Nutrition's Intense Brightening Cream saw visible results and a brightening effect in just two weeks with a 22% reduction in melanin quantity after just two months of use.

For those with dark or Asian skin, it helps to brighten the entire skin surface and lighten hyperpigmented areas.

Powerful Vitamin C for Powerful Results

And, our Intense Brightening Cream is formulated combining two cutting edge forms of vitamin C – an oil-soluble vitamin C ester PLUS a potent, light and oxygen stable vitamin C derivative to enhance skin brightening, revitalize and clarify, and support youthful collagen production to lift and firm skin.

Unlike other creams, the vitamin C combination found in our Intense Brightening formula is highly stable so you don't have to worry about your cream oxidizing. And, it delivers powerful antioxidant activity to help support free radical protection and prevent the premature aging and hyperpigmentation caused by both UVA and UVB rays.

Stem Cell Complex Plus Anti-Aging Peptides

There's one more secret weapon to enhance your glow and deliver truly ageless beauty found in Emmy Nutrition's Intense Brightening Cream – our proprietary Stem Cell Complex plus anti-aging peptides.

This wrinkle fighting duo supports your skin's multilevel collagen network and provides immediate hydration to renew and revitalize your skin, even your complexion, and diminish the appearance of age spots.

Working synergistically with the other ingredients, our Stem Cell Complex and peptides go to work right away, giving you lighter, brighter, more lifted, youthful-looking skin in less than three weeks.

The Latest in Skincare Technology

To ensure that you get the most out of every ingredient to achieve the lighter, brighter, more lifted, youthful look you want, we've formulated our Intense Brightening Cream to include the latest in skincare delivery technology.

This allows the lightening, firming, and beautifying agents to slip past the surface layers of your skin, where most products sit wasted, and penetrate the deepest layers to go to work and produce REAL results, fast.

Age is Just a Number

At Emmy Nutrition, we're here to help you accelerate your life and your beauty through science. So, embrace your glow, get the light, even tone and lifted look you want, and show the world that age is just a number with our Intense Brightening Cream.
