

### Why is glutathione important?

Protects cells from oxidative stress.

Supports the immune system.

### Where does it come from?

The body produces its own glutathione, but levels can be depleted by poor diet, pollution, toxins, stress, and aging.

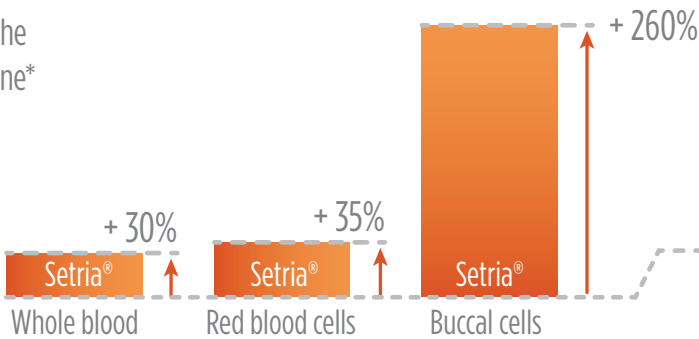

### A recent published study shows:

1 Setria® can help increase the body's stores of glutathione\*

6 Months

Setria® 1000 mg/day

Baseline

Taking 1,000 mg/day of Setria® showed a 30% increase in whole blood, 35% increase in red blood cells and 260% increase in buccal cells glutathione levels from baseline.

2 Setria® can increase NK cell activity two fold and support the immune system

3 Months

■ Baseline

■ Setria® 1000 mg/day

At three months the study revealed a 2 fold increase in NK cell activity at 1,000 mg of Setria® (NK cells support immune health).

3 Setria® supplementation needs to be ongoing to maintain elevated levels

One month after supplementation ended glutathione levels began to return to pre-study levels.

Setria® Glutathione does not adversely affect the body's normal production of glutathione.

Richie JP Jr, Nichenametla S, Neidig W, Calcagnotto A, Haley JS, Schell TD, Muscat JE. Randomized controlled trial of oral glutathione supplementation on body stores of glutathione. European Journal of Nutrition. May 2014; 1436-6207. doi: 10.1007/s00394-014-0706-z

**CONCLUSION:** Setria® Glutathione supplementation effectively increases the body's stores of glutathione and supports the immune system\*
